The Honorable Barack Obama
President of the United States
The White House
1600 Pennsylvania Avenue, N.W.
Washington, DC 20500

Dear President Obama,

We are excited to participate in #uiufresh (University Innovation Freshman), an initiative spearheaded by the University Innovation Fellows as a means to expand the participation of incoming first-year students into STEM disciplines. The program will help young students see problems as opportunities that should be approached with fresh eyes and an entrepreneurial mindset.

The initiative was developed in response to findings published by the President’s Council of Advisors on Science and Technology, in a report titled “Engage and Excel: Producing Once Million Additional College Graduates with Degrees in Science, Technology, Engineering, and Mathematics.”¹ The report indicates that 60% of U.S. freshman (in aggregate) who arrive to college intending to major in STEM, change majors to non-STEM disciplines over time. The report also cites the importance of the student experience that is connected to a community of STEM professionals and meaningful relationships with both peers and instructors, as a key factor in reducing departures from STEM fields.

As part of the initiative, University Innovation Fellows will work with Orientation Week organizers to hold design thinking, creativity, and innovation workshops that connect first-year students to peer communities of makers and innovators in STEM. University Innovation Fellows will also be visiting freshman seminar classes to talk about STEM, as well as hosting activities in the freshman-only residence hall. These programs will implement short, fun and engaging experiential learning opportunities that expose 100% of our incoming freshman class to the institution’s community of makers and innovators, with the goal of reducing the national percentage of STEM attrition by half in five years.

We believe students can have a powerful impact in driving student engagement in STEM, and we are excited to work with the University Innovation Fellows, a program of the NSF-funded National Center for Engineering Pathways to Innovation (Epicenter), to enhance STEM attraction and retention to ultimately meet U.S. workforce needs and strengthen our national competitiveness.

Sincerely,

The LTU Team
