President Barack Obama  
The White House  
1600 Pennsylvania Avenue NW  
Washington, DC 20500  

December 15, 2015  

Dear President Obama,  

We are excited to participate in #uifresh (University Innovation Freshmen), an initiative spearheaded by the University Innovation Fellows program as a means to expand the participation and retention of incoming first-year STEM students. The initiative will help young students see problems as opportunities that should be approached with fresh eyes and an entrepreneurial mindset.  

As part of the initiative, University Innovation Fellows and Pathways to Innovation Program teams will work to integrate entrepreneurship, design thinking, creativity and innovation into the freshman experience as part of orientation, a single class, or a series of classes that help students solve real-world problems and connect first-year students to peer communities of makers and innovators in STEM.  

The initiative was developed in response to findings published by the President’s Council of Advisors on Science and Technology in a report titled “Engage to Excel: Producing One Million Additional College Graduates With Degrees in Science, Technology, Engineering and Mathematics.” The report indicates that 60% of U.S. freshmen (in aggregate) who arrive to college intending to major in STEM change majors to non-STEM disciplines. The report also cites the importance of a student experience that is both intellectually and personally engaging and fosters “identification with a STEM field.” This can be established by connecting freshmen with a community of STEM professionals, and fostering meaningful relationships with both peers and instructors.  

University Innovation Fellows and Pathways to Innovation Program teams will work with their faculty, administrators and staff to implement fun and engaging experiential learning opportunities that expose 100% of the incoming freshmen class to the institution’s community of makers and innovators, with the goal of collectively reducing the national percentage of STEM attrition by half in five years.  

We believe that early exposure to entrepreneurship, innovation, creativity and design thinking are powerful tools to engage and retain not just STEM students, but innovative and entrepreneurial students from all majors. Rather than STEM alone, multidisciplinary collaborations and networks more accurately describes our ecosystem. Many arts, architecture and business students, faculty and staff
play proactive role in our entrepreneurial campus initiatives. We are excited to work with the University Innovation Fellows and Pathways to Innovation Program, initiatives of the NSF-funded National Center for Engineering Pathways to Innovation (Epicenter), to enhance student attraction and retention to ultimately meet U.S. workforce needs and strengthen our national competitiveness.

Sincerely,

Mark A. Mone
